REASONS FOR ALLOWANCE

1. The following is a statement of reasons for the indication of allowable subject matter: The instant application discloses a method for equalizing symbols received from a transmission channel and for decoding data therefrom. Prior art references show similar methods (Huynh et al. US Patent 6,028,901) but fail to teach: "first processing includes performing a turboequalizing sequence and a second processing which includes equalizing the received symbols and applying a turbodecoding sequence and performing the first processing when a value of a delay spread of the transmission channel rises above a first threshold and performing the second processing when the value of the delay spread falls under a second threshold", as in claims 1, 18 and 20; "first processing which includes coding the data using a convolutional code that includes a variable constraint length", as in claims 16, 19.
